

Instagram Feed & Other Plugins

Instagram Feed plugin uses Instagram API on website front end. All the data received from Instagram via API is cached in WordPress database for some short period to provide front end optimization. You may request us to delete your Instagram data if it is accidentally cached in our website database with hashtag feed data. Instagram saves some cookies in browsers of website visitors via API data.

Cookies adopted are mostly used for security purposes. They are regulated under terms of Instagram's [Privacy Policy](#).

10Web Disclaimer: The above text is for informational purposes only and is not a legal advice. You must ***not rely on it as an alternative to legal advice***. Should you need to obtain legal counsel, make sure that such obtained legal advice is with respect to your case.

Third parties

Hummingbird uses the Stackpath Content Delivery Network (CDN). Stackpath may store web log information of site visitors, including IPs, UA, referrer, Location, and ISP info of **site visitors for 7 days**. Files and images served by the CDN may be stored and served from countries other than your own. Stackpath's privacy policy can be found [here](#).

Plugin: Smush

Note: Smush does not interact with end users on your website. The only input option Smush has is to a newsletter subscription for site admins only. If you would like to notify your users of this in your privacy policy, you can use the information below.

Smush sends images to the WPMU DEV servers to optimize them for web use. This includes the transfer of EXIF data. The EXIF data will either be stripped or returned as it is. It is not stored on the WPMU DEV servers.

Smush uses the Stackpath Content Delivery Network (CDN). Stackpath may store web log information of site visitors, including IPs, UA, referrer, Location, and ISP info of site visitors for 7 days. Files and images served by the CDN may be stored and served from countries other than your own. Stackpath's privacy policy can be found [here](#).

Smush uses a third-party email service (Drip) to send informational emails to the site administrator. The administrator's email address is sent to Drip and a cookie is set by the service. Only administrator information is collected by Drip.
